Greetings for WONCA APR 2019 in Kyoto, JAPAN

Why it's worthwhile to join us at WONCA APR 2019 in Kyoto

Dear Colleagues,
WONCA APR conferences have become the most influential event for family physicians/general physicians from Asia Pacific regions. Although WONCA APR in Kyoto in 2019 is the Asia Pacific Region conference, participants will enjoy variety of topics and will meet variety of speakers from around the world in addition to reconnecting with colleagues from the Asia Pacific region. Please see the variety of topics covered in the conference and follow the conference tracks of particular relevance to you.

'Medical generalists –bringing forward a brighter future' is the official theme of this conference. Generalist discipline is the most important but least appreciated discipline in many regions across the globe. Evidence of the health-promoting influence of primary care has been accumulating ever since researchers have been able to distinguish primary care from other aspects of the health services delivery system and main players of primary care are the generalists.

We are going to prepare a balanced program based on original abstracts, contributions suggested by leading international scientific networks, committees and groups recognized by WONCA. As we combine the Annual Conference of JPCA with the WONCA conference, participants will be able to communicate with many Japanese family physicians and hospital-based generalist physicians.

Enjoy the beautiful city of Kyoto, full of character and culture, and return home refreshed and invigorated, with new ideas to enhance your practice, education and research!

Prof. Nobutaro Ban

Chair of the Organizing Committee WONCA APR Conference 2019
Professor and Director, Medical Education Center, Aichi Medical University School of Medicine

'Medical generalists –bringing forward a brighter future' . This is a most appropriate theme of the 2019 WONCA Asia Pacific conference to be held in Kyoto in May 2019. A Generalist approach in Primary Healthcare focusing on breadth rather than depth is most important in the provision of quality care through the practise of Family Medicine.

As we celebrate 40 years of the Alma Ata declaration with a commitment to achieve health for all through Primary Healthcare, the role of the Family Doctor is emphasised as a generalist providing continuous comprehensive holistic care. I am sure speakers and participants at the conference will share their views and experience to support the theme that medical generalists will bring forward a brighter future towards Universal Health Coverage.

I am looking forward to meeting you at our WONCA conference in Kyoto. I am sure you will find this conference a rewarding and enjoyable experience, and that you will make many new friends among our family medicine colleagues from around the world attending this conference.

Best wishes,

Dr. Donald Li
President-elect
WONCA World Executive Council
