

## 56. Hypertension (clinical)

Abstract No.	First Name	Last Name	Abstract Title	Session ID	Language
10014	Kazushi	Tsuda	Omentin-1 Predicts Membrane Microviscosity of Red Blood Cells and Microcirculatory Function in Hypertensive Subjects by a Nitric Oxide-Dependent Mechanism	56-1	English
10097	Shinichiro	Tanaka	Visit-to-visit Variability in Blood Pressure During 5-years and Phasic Left Atrial Function &#8211;Assessment by Two-dimensional Speckle-tracking Echocardiography-	56-3	日本語
10313	Takamichi	Takahashi	The Mechanisms of Age-Related Difference of Annual Changes in Ankle-Brachial Pressure Index	56-1	English
10348	Takeshi	Fujiwara	Clinical Impact of the Maximum Value of Home Blood Pressure on Cardiovascular Outcomes: a Novel Home Blood Pressure Variability Indicator	FRS-1	English
10468	Takeko	Kawabata	Insufficient blood pressure control even with antihypertensive drug is independently associated with high arterial stiffness	56-3	日本語
10601	Shinji	Kishimoto	A Study to Compare the Effects of Adrenalectomy and Eplerenone on Vascular Function in Patients with Aldosterone-producing Adenoma	56-1	English
10651	Hiroataka	Hoshino	The possibility of underlying primary aldosteronism should be considered when we see the patients of atrial fibrillation	56-3	日本語
10655	Tomomi	Ueda	Impact of Hyperaldosteronism on Cardiac Functions Analyzed by Echocardiography	56-1	English
10920	Michiaki	Nagai	Does Blood Pressure Burden and Cardiac Load have Sex-specific Associations of Nocturia in the Japanese at High-Risk of Cardiovascular Disease?	56-2	日本語
11279	Keisuke	Narita	Morning Minus Evening Systolic Blood Pressure Difference (MEdifference) in Home Blood Pressure are Associated with Cardiovascular Events: the J-HOP Study	56-1	English
11286	Yosuke	Takamiya	Multicenter prospective observational study of Micamlo&reg; combination tablets in patients with uncontrolled essential hypertension	56-2	日本語
11552	Takuro	Kubozono	Day-to-day variability in home blood pressure is independently associated with liver stiffness and chronic kidney disease	56-3	日本語

## 56. Hypertension (clinical)

Abstract No.	First Name	Last Name	Abstract Title	Session ID	Language
11671	Takuro	Kubozono	Day-to-day variability in home blood pressure has an independent association with NT-pro BNP not but with high-sensitivity troponin T	56-3	日本語
11682	Syuhei	Ikeda	Prognostic Impact of Pulse Pressure on Cardiovascular Events in Japanese Patients with Atrial Fibrillation: The Fushimi AF Registry	56-2	日本語
11800	Nagaharu	Fukuma	Sense of Anxiety and Family History of Hypertension Alters Profile of Home BP and HR in Young Healthy Adult	56-2	日本語
11853	Kazusa	Hayashi	What is the Optimal Blood Pressure Level for Kidney in Hypertensive Subjects under Medication?	56-2	日本語
11856	Hiroyuki	Takase	Year-to-Year Blood Pressure Variability and Target Organ Damage	56-3	日本語
11863	Masahiro	Suzuki	Impact of in-hospital blood pressure variability on clinical outcomes in patients with symptomatic peripheral arterial disease	56-1	English
12121	Takayuki	Nagai	Elderly patients with hypertensive heart disease are susceptible to heart failure despite preserving left ventricular systolic function	56-2	日本語
