

What is Power Pitch?

The Power Pitch session is a format designed to overcome the problem that we cannot have in-depth discussions within the question time of three minutes in conventional oral presentations. The format is composed of two parts – a 3-minutes presentation and discussion.

- A. 3-minutes presentation: Three-minute video presentations for each abstract are delivered continuously, without breaks for questions. In your 3-minutes presentation, please focus on the essence and important aspects of the research to present a whole picture.
- B. Discussion
 - 1. General discussion: After the mentioned presentations, all abstracts are discussed under moderation of the Chair. Remote participants can also ask questions via a chat.
 - 2. Individual discussions: After the general discussion, questions are asked and answered using Digital Posters that illustrate content of the research. Audiences can gather in front of monitors displaying the abstracts of interest and enter into discussions with the presenters. This will be implemented on site only.

Power Pitch session: presentation format for in-depth discussion
